USDTree Whitepaper

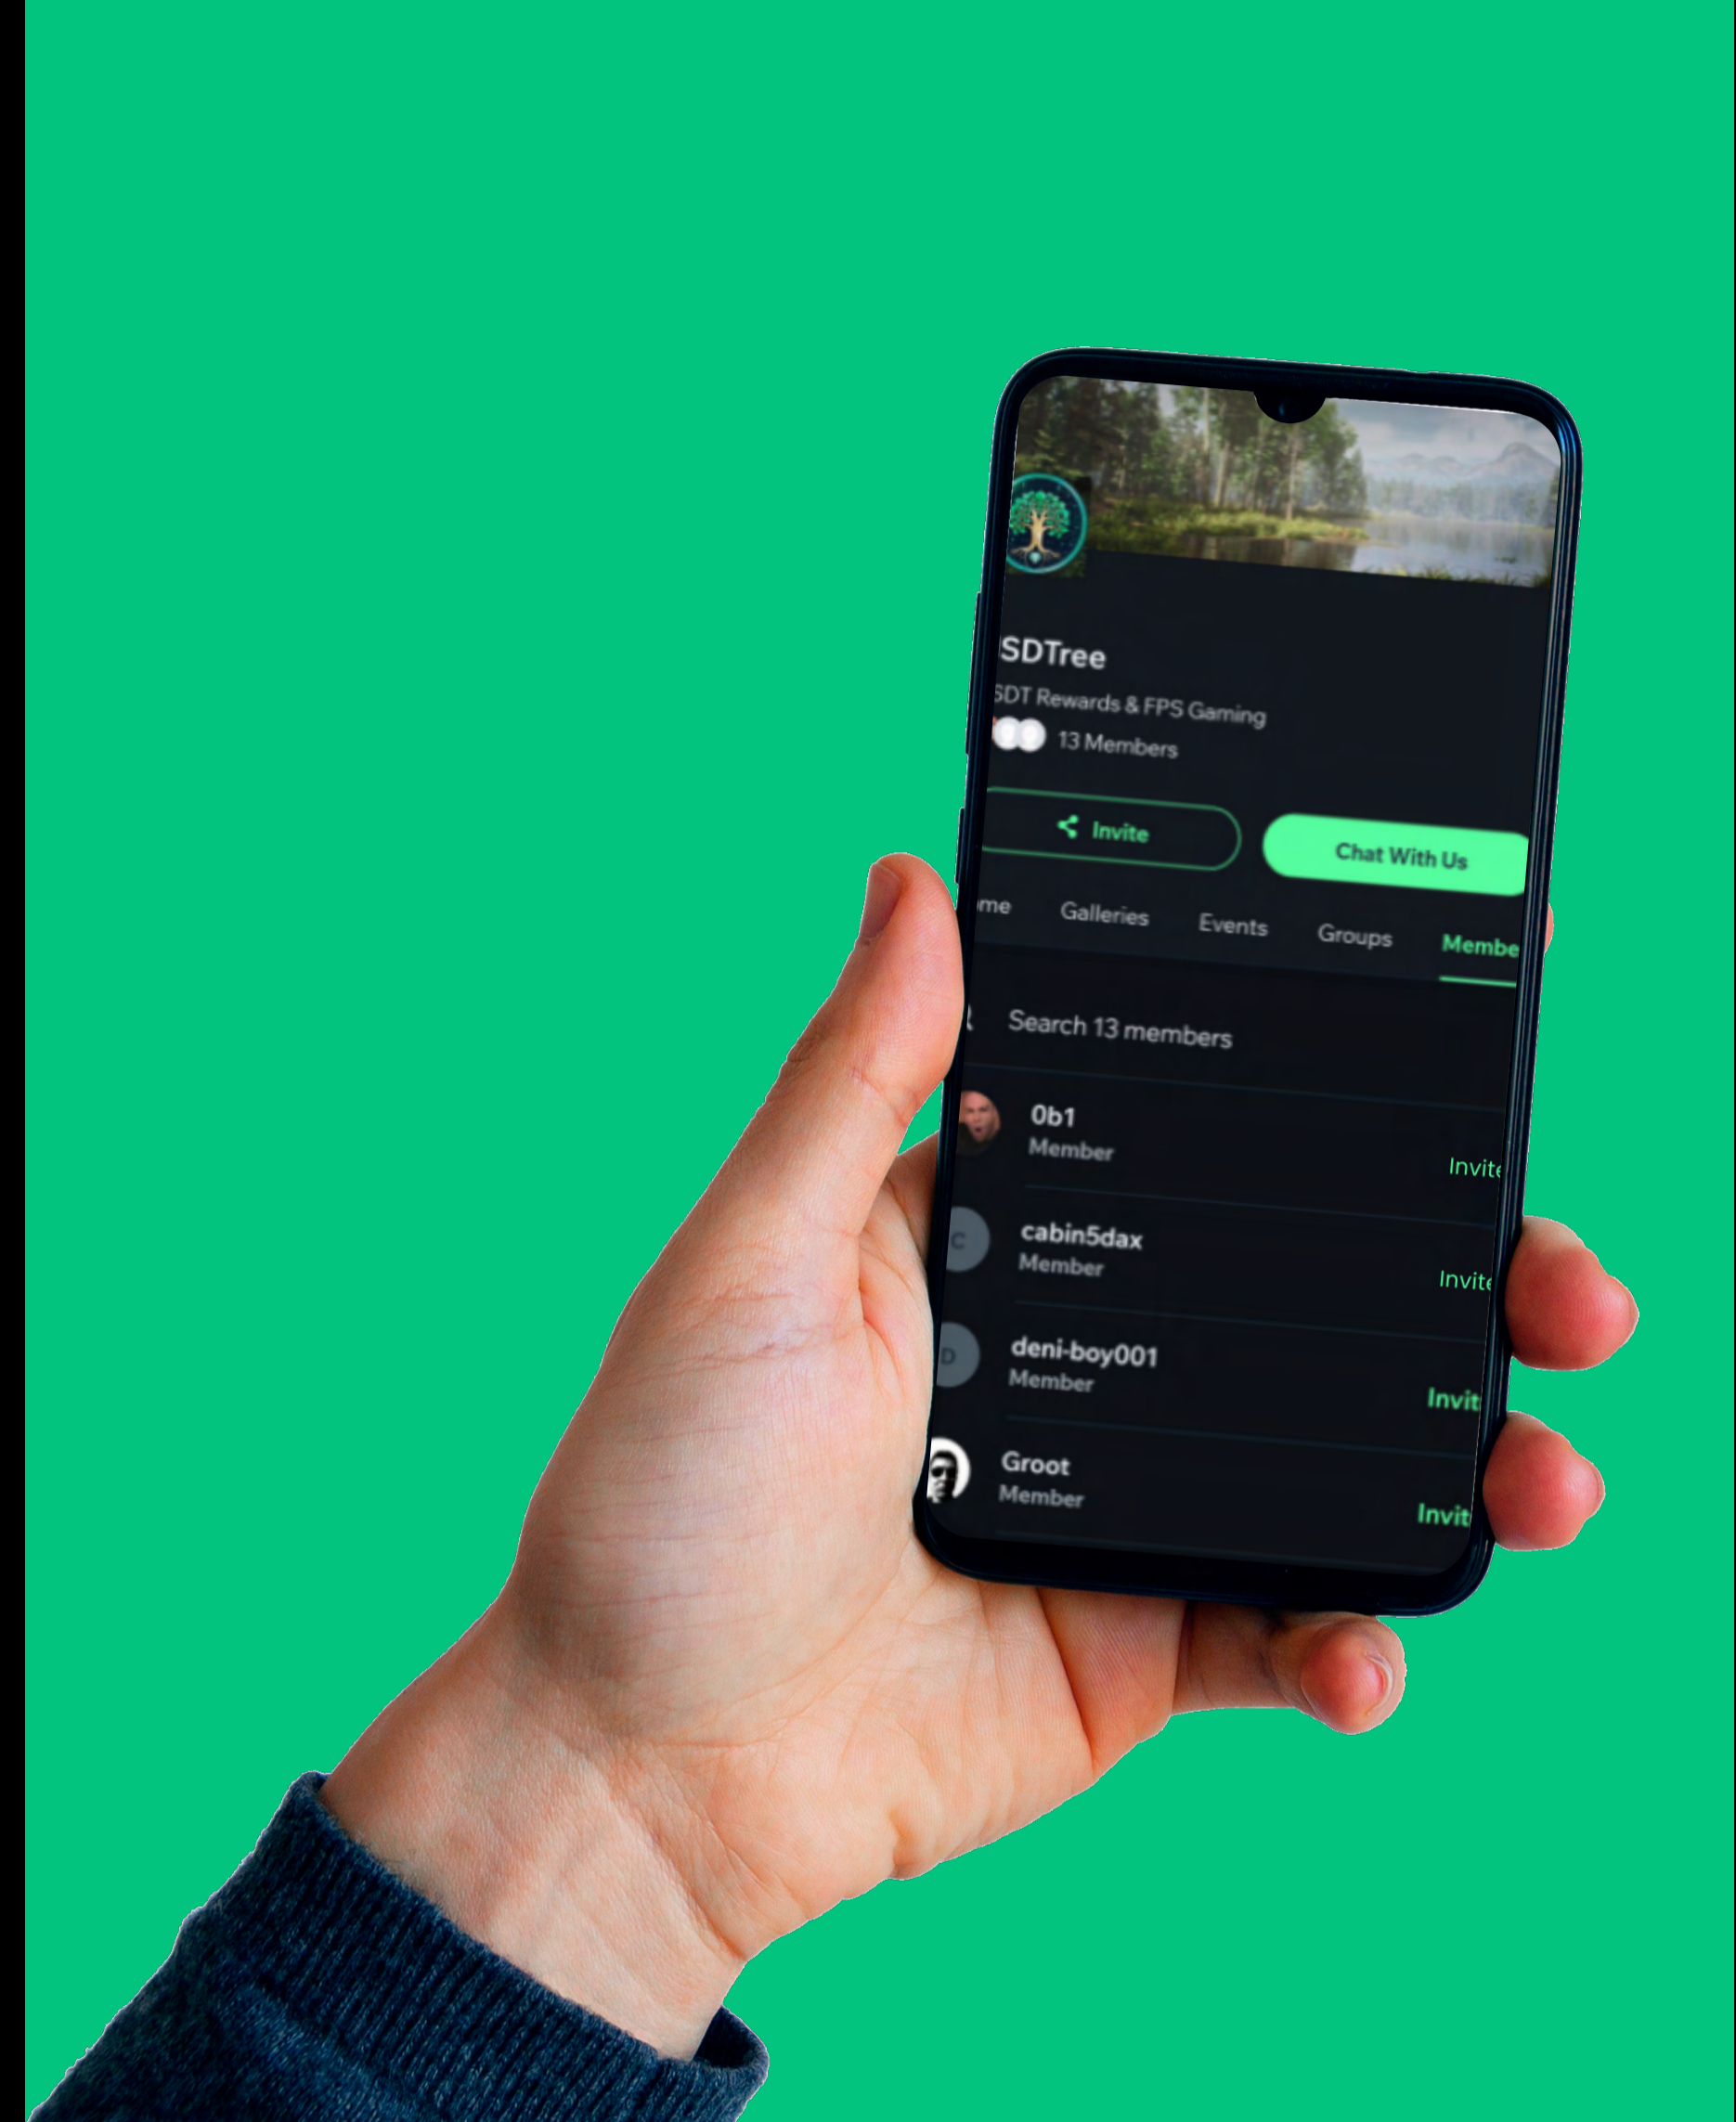

Where Digital
Realms Deliver
Real Dividends

USDTree

Our Introduction

USDTree is a digital asset with a unique blend of growth and rewards: it provides an automated 6% USDT payout to holders and integrates with a AAA-quality FPS game. Along with other activities, this enhances the token's economy through buy/sell actions, further boosting USDT rewards.

Serving as the core of the USDTree ecosystem, the token helps facilitate gamified online engagement and commerce. It acts as a medium for unlocking diverse experiences in an expansive gaming matrix. This whitepaper provides a comprehensive overview of the USDTree ecosystem, its mechanics, vision, and future trajectory.

The Gaming Matrix

The Gaming Matrix is a multifaceted virtual environment incorporating games like Murk & Pinball, social spaces, & marketplaces. It operates under unique economic & rule-based frameworks, offering diverse experiences for users & developers. The space is designed for scalable expansion, enabling creative & commercial interactions.

Token Ecosystem

The USDTree ecosystem is a cohesive network of digital experiences, activities, and utilities, all built around the USDTree token. This section outlines the various components that make up the ecosystem, their interconnectivity, & the features that make USDTree a compelling project.

USDTree: Beyond Just Rewards

The USDTree token is the foundational core token of the ecosystem. It functions as both a currency and a utility token, facilitating transactions, granting access to specific features, and more. USDTree isn't just a rewards token; it's a multifaceted asset that integrates FPS gaming transactions and NFT microtransactions to offer perpetual rewards for holders. This blend of crypto, rewards, NFTs, and gaming creates a potent product with vast potential. Whether it's entering tournaments, claiming prizes, or engaging in in-game NFT transactions, these tokens are your ticket to a rewarding experience. Abundant buys and sells on the chart mean that holding tokens yields consistent rewards.

But rewards aren't just for token holders. Our Tournament Play System offers enticing prizes for gamers, making the ecosystem accessible and rewarding for all.

Here's how to dive into the action:

Head over to [epicgames.com](https://www.epicgames.com) and download the launcher.

Open the launcher, click on "Store," and search for "MURK."

Download and install the game, then launch it to arrive at the login screen.

Create an account and connect your wallet using WalletConnect2.

The main menu allows you to choose your map and enter a lobby. To join, pay the required amount of tokens, which are verified before you can proceed.

Play and Score: Engage in standard FPS gameplay. At the end, see your scores and decide if you want to play again. Leaderboards can reset at various intervals, offering multiple competition types.

USDTrain

USDTrain connects all major hubs in the Matrix. It will be free to board if you wish to utilize the arcade for a standard bet fee on each game, or board the train and pay a tiny fee (something like 1/10 or 1/20 of the arcade fee) to utilize fast travel. All game-generated buy/sell actions contribute to rewards for token holders, helping sustain the ecosystem.

MURK

MURK FPS will be the focal point of our gaming ecosystem at the outset. Matchmaking will be available for solos and teams. Players will pay their entrance fee and their tokens will be held in the vault until either the match ends or the tournament timer expires. This may be an instant payout to those playing a one-off match or a payout after a day, week, month, etc depending upon the length of the tournament.

Murk funds will be held in the vault until payout, and payout to players will be proportioned based on finishing place as is the norm with most tournament style events. 1v1 matches will be winner takes all, team matches will also be winner takes all and prizes will be split proportionally amongst the winning teams players based on in-game scoring metrics. Any other random matchmaker event payouts will be based on the in-game scoring metrics payout structure.

Focal Point of the ecosystem

MURK FPS will be the focal point of the ecosystem in the early stages. Once we begin to build out the Gaming Matrix, MURK FPS will remain an integral revenue stream along with the many other games we will add to the Matrix in the future.

Majority of the Revenue

The majority of MURK FPS revenue will go back to the players with a small share of the proceeds being fed to server cost/maintenance and development.

2nd Revenue Stream

A 2nd revenue stream tied to MURK FPS will be the perpetual Looter Mint. This mint will offer a variety of loot drops such as, but not limited to, Rooter/Shooter skins, weapon attachments, weapon/class stat boosts, and super rare limited mints of extraordinary gear.

Pinball

USDTrain Pinball will be an additional revenue stream at the outset. It will have a similar tournament structure to that of MURK FPS with a live tournament board for daily, weekly, and monthly player payouts at the start. Tournament duration will be determined by use and community needs. The majority of USDTrain Pinball revenue will go back to the players with a share of the proceeds being fed to the revenue share for the USDTrain NFTs. Additional arcade style mini games will be added to the USDTrain Gaming Car as we evolve and this will also feed the NFTs holder's revenue share.

Token Allocations

Total Supply 1,000,000,000

30% locked on launch

20% allocated to staking and ecosystem needs

10% reserved for future needs

No Team Tokens

2% allocated for Liquidity Pool (LP)

Final Tax Distribution

7%

Buy Sell Tax

6% allocated for Rewards
1% allocated for LP

Note: The final tax structure may be adjusted slightly toward LP if needed.

Blockchain Integration & Gaming Ecosystem

One of the cornerstones of our platform is the full integration of blockchain technology, paving the way for an autonomous, self-sufficient gaming and rewards ecosystem. This integration encompasses all major aspects of our gaming environment, including but not limited to game fees, payouts, and Non-Fungible Tokens (NFTs). Our leaderboards will also be blockchain-enabled, ensuring transparency and tamper-proof records.

Native Integration with Unreal Engine 5 (UE5)

Our platform is empowered by Unreal Engine 5, which provides native blockchain integration capabilities. This advanced feature set includes the ability to construct and dispatch blockchain transactions directly from within the engine. Furthermore, UE5 enables seamless communication with smart contracts. This eliminates the need for any external applications or APIs, as all required functionalities can be packaged directly with the game.

The USDTree ecosystem operates on BSC network ensuring transparency, security, and scalability. This platform supports the functionalities of the USDTree token, as well as the various applications and games within the ecosystem.

Partnerships and DApps

The USDTree Reward Claim DApp is a significant component of the ecosystem, offering one of the highest paying rewards on the BSC (Binance Smart Chain) network with 6% rewards in USDT per transaction. The DApp is designed for ease of use, allowing users to claim their rewards without navigating BscScan or engaging in additional token transactions. Users simply connect their wallets and click the claim button when rewards are available. The DApp is part of SenseiToken, a multi-reward utility project on the Binance Smart Chain, giving users the option to pick their rewards from over 30 different projects.

For more information, visit <https://dapp.senseitoken.net/>

Security Measures

Audits will occur at a later date as there will be various contracts supporting the ecosystem which will need to be checked for security vulnerabilities prior to scaling the user base.

Roadmap

Phase 01 : Planting the Seeds

- Stealth Launch: We're kicking things off discreetly but powerfully. Initial High-Yield Staking: 300% APR
- Building Our Community: Aiming for 75 strong and committed initial members.
- Market Cap Goals: We're targeting a stable market cap between \$20,000 and \$25,000.
- Engage and Compete: Community competitions to make things interesting.
- Stay Connected: We'll be launching our Twitter account.
- Get Informed: A dedicated website to keep you in the loop.

Phase 02 : Nurturing the Sapling

- Level Up with Rewards: Launching our Dapp for awesome rewards.
- Stake Your Claim: Introducing staking options.
- More Fun, More Wins: Even more community competitions on the way!
- Spread the Word: Twitter Raids and targeted marketing.
- First Partnership: We're thrilled to announce our first strategic partner. Adjust staking , fine-tune token taxes and prize pools.

Roadmap

Phase 03 : Strengthening the Trunk

- NFT Drop: Get ready for our first batch of exclusive NFTs.
- Keep Competing: Yes, more community competitions.
- Marketing Boost: We're stepping up our promotional efforts.

Phase 04 : Branching Out

- Play and Earn Beta: Launching Play-to-Win (P2W) and Play-for-Volume (P4V) options.
- Get Competitive: First-Person Shooter (FPS) competitions kick off.
- Ask Us Anything: Join us on our AMA tour for all your burning questions.
- Second Partnership: Another big partnership announcement.
- Cash In: Start winning real money while playing our crypto games.

Mid Term:

Focus on the Invisible Tree

Phase 07

Gaming Community
Outreach:
Gaming Matrix Release:
Treehouse Integration:

Phase 06

Full BSC Integration:
Looter NFTs:
X's Tournament Play:

Phase 05

Player & Holder Outreach:
Shooter NFTs:
Continued AMA Tour:

Long Term: Focus on the Forest

Phase 10

Pursue Token Listings

Phase 09

Ecosystem Stability & Additional Revenue Streams

Phase 08

Build Out Gaming Matrix

Governance & Community Involvement

The USDTree project places a strong emphasis on active community involvement. With a thriving community of crypto enthusiasts, USDTree regularly hosts community competitions, especially during Phases 1 and 2, to engage members and offer rewards. In addition to this, the project maintains an active social media presence on platforms like X (Twitter), where community members can participate in marketing initiatives to contribute to the project's growth.

How to Buy USDTree Token

Create a Wallet

Download MetaMask or your preferred wallet from the App Store or Google Play. For desktop users, get the MetaMask Chrome extension at [MetaMask.io](https://metamask.io).

Access PancakeSwap

Navigate to PancakeSwap via Google Chrome or MetaMask's in-app browser. Connect your wallet and paste the USDTree token address into PancakeSwap to select it. Sign the wallet prompt to proceed.

Fund with BNB

Ensure your wallet has BNB for swapping into USDTree. If you don't have BNB, you can purchase directly within MetaMask, transfer from another wallet, or buy from an exchange & send it to your wallet.

Make the Swap

In PancakeSwap, specify how much BNB you'd like to swap for USDTree. Set the slippage slightly higher than the token's tax rate.

Note: Higher slippage may be needed during market volatility. Confirm the transaction, & you're all set—now just HODL!

NFT Collection & Marketplace

Rooters

NFTs (mint completed) Limited to 229, these NFTs offer:

- A share of game revenue.
- Unlimited access to member areas.
- Up to 3x game winnings boost.
- Character class stat enhancements.
- Subtle weapon and elemental boosts.

Shooters

NFTs (coming soon!) this collection provides:

- Weapon-specific stat boosts.
- Access to special, unique weapons and attachments.

Looters

NFTs (perpetually minting) these NFTs include:

- Augmented weapon and class stats.
- Customization with skins and accessories.
- Special edition and Holiday perks.
- Our NFTs will be available on reputable platforms like Tofu, NFTrade, and Opensea.
- Initial trading on Tofu and NFTrade, with a dedicated marketplace on usdtree.info soon after.

Referral Rewards

With our Tournament Play Referral Program, you can earn big while helping us grow.

1-4 Referrals: Earn 100k USDTree tokens per referral.

5-9 Referrals: Bump it up to 150k per referral.

10+ Referrals: Enjoy 200k per referral.

Cap: A maximum of 100 referrals, because there's such a thing as too much of a good thing!

For those who are further invested in the USDTree ecosystem through NFT ownership, the rewards are even more compelling. Holding an NFT not only signifies your deeper engagement with our community but also unlocks a higher tier of referral rewards, making each of your referrals more valuable.

Referral Rewards

Holders

1-4 Referrals: Start with 200k USDTree tokens per referral.

5-9 Referrals: That's 300k per referral.

10+ Referrals: A whopping 400k per referral.

Cap: Max out at 50 referrals.

What Qualifies as a Referral: Get Your Friends on Board

Member Account: The person you're referring, should create a member account by clicking the login button on our website. The referred person can easily sign up using Google. To qualify, the referred individual must buy 0.15 BNB worth of USDTree tokens. Have the referred person send their transaction hash to our site admin via chat for verification.

Once these steps are completed, your referral is qualified, and you'll both gain access to exclusive member benefits on our website. Please note: all referral rewards are paid out in USDTree tokens and your referrals need to sign up for a Member's Account for you to get paid.

Risks & Disclaimers

Readers of this whitepaper acknowledge and agree that there are numerous risks associated with purchasing USDTree, holding USDTree, and using USDTree for participation in the Gaming Matrix. IF YOU DECIDE TO PURCHASE USDTree, YOU EXPRESSLY ACKNOWLEDGE, ACCEPT AND ASSUME THE FOLLOWING RISKS:

- 1. Regulatory Actions:** In many jurisdictions, the regulatory status of cryptocurrencies is unclear. Virtual currency regulation has evolved into the main focus of legislation in all significant nations worldwide. It is impossible to foresee how, when, or even if regulatory bodies would use current regulations in relation to such technology and its applications or whether they will ever do so. As a result, for token sales, the sale strategy may be continuously altered to minimize any pertinent legal issues.
- 2. Inadequate disclosure of information:** The USDTree ecosystem is still in its early stages of development, and as such, its design principles, consensus methods, algorithms, codes, and other technical aspects and parameters may be regularly and continuously revised. Although the most recent information about the USDTree ecosystem is contained in this white paper, it is not entirely complete and may occasionally be modified and updated by the USDTree team. Insufficient information sharing is inevitable and appropriate since the USDTree team is unable and under no duty to inform holders of USDTree of every detail (including development status and anticipated milestones) on the initiative to establish the USDTree ecosystem.

Risks & Disclaimers

- 3. Other risks:** Additionally, the potential hazards that were briefly discussed above are not all-inclusive; there are still other risks associated with buying, holding, and using USDTree, including some that the Company or the Team cannot foresee. These could also manifest in the form of unexpected variations or combinations of the aforementioned dangers. Prior to purchasing USDTree, you should perform thorough due diligence on USDTree, the Gaming Matrix, their respective affiliates, and the USDTree staff. You should also be aware of the USDTree Gaming Ecosystem's overall structure, objective, and vision.

Conclusion and Summary

The USDTree project is a groundbreaking initiative that promises to redefine the landscape of decentralized gaming and tokenomics. At the heart of this ecosystem is the USDTree token, a versatile digital asset designed to gamify online engagement, commerce, and community. The project is underpinned by a robust technology stack that includes innovations like the USDTree Reward Claim DApp, BSC integration, and Unreal Engine 5 (UE5). With a community-centric approach to governance and a roadmap outlining long-term growth, USDTree is well-positioned to make a lasting impact in the crypto ecosystem.
